Major Doge

About Major Doge

Major Doge was created with a goal to combine an instantly recognisable and loveable Meme Token with strong utility. Major Doge will achieve this goal by, firstly, establishing strong brand-awareness with cutting edge graphics and engaging content, and by secondly launching the highly anticipated Major Swap.

MajorSwap is Major Doge's own decentralised exchange platform, designed with ease of use and major in mind. MajorSwap will provide users with the ability to trade any BSC Token and, in a phase two rollout, will implement an Ethereum Bridge, to allow the additional trading of any ETH Token and expand the reach of the Major Doge project, onto another network, targetting new investors.

Additional features within MajorSwap include Staking (initially of the MajorDoge native token, \$MDOGE, but there are future plans to provide staking pools of various BSC & ETH Tokens) and a Dashboard, displaying the user's fund values in USD and \$MDOGE.

There are also further plans to release Major Doge NFTs, to bring additional utility to the project and MajorSwap in particular, with more detail to be released after launch as to ensure that the initial focus remains on the MajorSwap rollout.

The Major Doge team ensure that transparency, user major and community involvement are at the forefront of what they do.
